Light Handles O.R. Camera Cover Pin Covers Safety Pins Snares
Surgical Headband Suture Aid Booties Vessel Loops

MEDSTRAP HOLSTER – Infection Control Device

SuctionShield is a disposable, lightweight holster that quickly and easily attaches to virtually any horizontal surface to hold a Yankauer suction tip — isolating suction implements and reducing cross contamination and pathogen transmission. The disposable, single-patient-use-product means no more oral suction tips placed under pillows, in bedding, on tray tables, or draped wherever they happen to land. When used suction tips, which are covered with secretions, touch any surface they create biofilms promoting cross-contamination

HENNISS- Germany- Surgical Instruments

MORGAN LENS- USA

The Morgan Lens provides continuous lavage to the cornea and conjunctiva, floating on the irrigating solution and never physically touching the cornea. The irrigating solution provides instant relief

Product Range – MRI & Radiology

IRADIMED CORPORATION- USA

The MRidium™ 3860+ and its ability to infuse medications in the MRI room extends the same quality of bedside care experienced in other areas of the hospital right into the MRI suite. The MRidium™ 3860+ helps replace 'work around' solutions like running long lines from conventional pumps through a sealed MRI door or wave guide. The 'work around' practice of placing long lines from outside the MRI control room may lead to questionable flow rates and alarm delays due to line occlusions, increased infection rates and costly medication waste. Cleared by the FDA for use with up to 3T MR scanners.

SPO2 MONITOR- FROM IRADIMED USA

iMagox™ is designed from the ground up to work in the MRI and deliver safe, reliable patient readings. Intended for use in MRIs with strength from 0.2T to 3T, and is completely operational upto 10000 Gauss.

MRI FERROMAGNETIC DETECTION & PRE SCANNERS

We offer a wide range of Ferro-magnetic detection systems, and entry control systems from FerroGuard-Metrasens UK. FerroGuard also offers portable pre-screeners for the MRI. Please contact us for any further questions

Regulator Cylinder Cart
0-15 lpm Flowmeter

Product Range – Gynecology

Gynecology Video Colposcopy Systems

OB/GYNs should be equipped with the best tools to make diagnostic assessments simpler and more accurate. Brilliant optics in the eVA colposcope reveal the most subtle lesions or atypical vascular patterns and provide improved control over biopsies, with sharp details extending all the way to the peripheral margins. Doctors are further supported by unique features such as an ergonomic control cluster, vertical height adjustment with EZLift, and an onboard 50W LED illuminator for bright, white, and unwavering light.

High Frequency Desiccator – BOVIE Medical USA

The Bovie® 3-Button Handpiece – Better By Design, Inside And Out . The basic function of a 3-button handpiece is to allow the user to control power up/down and to activate the high frequency desiccator. The Aaron® 940 has a technology advantage right in the handpiece: a superbly engineered collet that's even gold plated for superior conductivity. The collet is attached to our circuit board and the entire handpiece is encapsulated and formed in a high tech polymer that combines comfort for you with a sure grip. The buttons on the handpiece have been designed for superior tactile feel and comfort. Finally, it's autoclavable so you can have sterility when you need it, and an easy to clean and durable handpiece all the way around.

Cryo Surgical Guns

two-trigger cryosurgical system delivers fast and precise freeze/defrost control and allows cryotips to be changed at any time without venting.

- More effective freeze/defrost in less time
- Freeze and defrost only when triggered
- Lightweight, well-balanced and maneuverable
- Use with Wallach's large selection of cryotips and disposable plastic shields
- Available with N2O or CO2 tanks
